Re: R & G #62 Lunt  
Dakota gas well

Dear Emery:

This is the well in which I ran a tubing packer and circulated Kennpack behind the tubing to seal off casing holes, all of which turned out fine; however, the only forms I have at hand are NMOCC Form C-104 and USGS Form 9-330, neither of which are suitable for reporting the work done.

Will you please send me one dozen copies of your forms for reporting this work.

Thanks again for all your help.

Sincerely,

R & G DRILLING COMPANY, INC.

*Bill Ruddy*
