DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Run 6h jts. of 7 5/8" 26.109 4-55 (2756') casing, landed at 2750' (KB), with 125 sacks of regular cement with full returns throughout job. Casing was pressured to 700' for one hour, prior to drilling plug, and showed no drop. This intermediate string of casing was made necessary due to well unloading and excessive lost circulation. A 5 1/2" production string of casing will be run in well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
