BUSH
Well No. 4 is located 1650 ft. from N line and 1980 ft. from W line of sec. 14
NE 1/4 - SW 1/4 - 14 30N - 17W N.M.P.M.
(4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
WILDCAT SAN JUAN NEW MEXICO
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5127 ft. G.L.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I propose to drill a Gallup test to a depth of approximately 1900'. Hole size will be 4 3/4" and I plan to use air circulation.

I will set one joint of 5 1/2" surface casing. Surface casing will be cemented to the surface. Production casing program hasn't been worked out as yet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
