DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ute Mountain Tribal "A" No. 4 was spudded on December 7, 1958, and on December 8, 1958, 8-5/8" casing was set at 211' with 160 sacks of cement. After waiting on cement, casing and water shut-off were tested with 400 pounds pressure for 30 minutes, which held with no drop in pressure. Reduced hole to 7-7/8" and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
