ARCO Oil and Gas Company respectfully requests approval for extension of long term shut-in status on this well. Over the past two years, ARCO has reactivated several previously uneconomic long term shut-in wells and found commercial production. In addition, an ongoing CO2 feasibility study is underway which may yield significant additional oil recovery. Implementation of a CO2 flood would require the workover of existing wells, and the drilling of new wells. For these reasons, ARCO proposes that this well be maintained in the long term shut-in status so that the wellbore will be available, should future production tests indicate commercial production or should it be needed as part of a future CO2 flood. This plan eliminates the economic waste of potentially usable wellbores and promotes conservation. THIS APPROVAL EXPIRES THIS APPROVAL EXPIRES SEP 01 1990 OIL CON. In this plan eliminates the economic waste of potentially usable wellbores and promotes conservation.	ж	PRICE OF INTENTION TO:	1	SUBS	BQUBRY EBPORT OF:
