The elevation of the derrick floor above sea level is 5553 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

A 4-3/4" hole was cut in the 5 1/2" casing at 3855' and a 4-3/4" hole was then drilled to 4100'. The well was fraced with 20,000 gal lease crude and 30,000 gal sand. The well is presently on a productivity test.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
