DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This notice is to cancel the Sundry Notice submitted 1-21-61 which requested permission to notch, fracture and inject water into the lower Gallup. Two similar attempts in this area established communication between upper and lower Gallup, therefore we do not wish to perforate or fracture the lower Gallup in this well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
