ate names of and expected depths to objective sands; show	v sizes, w	OF WORK eights, and lengths of proposed casings; indicate multiple jobs, ce important proposed work)					
ate names of and expected depths to objective sands; show	v sizes, w	eights, and lengths of proposed casings, indicate mudding icho					
ate names of and expected depths to objective sands; show ing points, and a Propose To: Set 300 feet of 5 5/6" exclude	v sizes, we all other	eights, and lengths of proposed casings; indicate muddies jobs, ce important proposed work)					
Propose To: Set 300 feet of 5 5/6" surface Drill with rotary to appreciate	v sizes, we all other	eights, and lengths of proposed casings; indicate mustice jobs, ce important proposed work) RECEIVED ag and compat to surface. Table free called 7 1962					
Propose To: Set 300 feet of 8 5/8" surface Brill with rotary to approximately the behave formation.	w sizes, we all other	eights, and lengths of proposed casings; indicate multipe jobs, ce important proposed work) A CELL COLUMN TRANSPORT					
Propose To: Set 300 feet of 5 5/8" surface Brill with rotary to approximation. total copts and causat with 25	v sizes, wall other	ng and comment to surface called a production casing and comment to surface called a production casing cases collections casing and collections casing a collection casing a collection casing cases collections.					
From the labora formation.	v sizes, wall other	eights, and lengths of proposed casings; indicate mustice jobs, ce important proposed work) A CELLED Ag and compact to surface. The production casing at two-stage compact collars.					
Propose To: Set 300 feet of 5 /6" surface Drill with rotary to approximately 100 feet below to cover both the Messverde as	v sizes, wall other	rights, and lengths of proposed casings; indicate mustice jobs, ce important proposed work) ACCEPTED Ag and comment to surface. The depth of 725 feet oAUG1 7 1962 The production casing at two-stage comment collar surveyed formation and comment curred Cliffs formations.					
From the names of and expected depths to objective sands; show ing points, and ing points in the points of	v sizes, wall other	rights, and lengths of proposed casings; indicate mustice jobs, ce important proposed work) ACCEPTED Ag and compat to surface. The production casing at two-stage counst collar control cases and compation and compations.					
Propose To: Set 300 feet of 5 5/6" surface Drill with rotary to approximately 100 feet below to cover both the Meseverde as Forferate and sand-water frac	v sizes, wall other all other to the to the to the the to the to the to the to the tother to the tother tot	eights, and lengths of proposed casings; indicate mustice, jobs, ce important proposed work) A CELLED Ag and comment to surface. A COLUMN ACCOUNTS CONTROL OF TABLE CONTROL O					
Propose To: Set 300 feet of 5 5/6" surface Drill with rotary to approximately 100 feet below to cover both the Messverde as	v sizes, wall other all other to the to the to the the to the to the to the to the tother to the tother tot	eights, and lengths of proposed casings; indicate mustice, jobs, ce important proposed work) A CELLED Ag and comment to surface. A COLUMN ACCOUNTS CONTROL OF TABLE CONTROL O					
Propose To: Set 300 feet of 8 5/8" surface Drill with rotary to approximately 100 feet below to cover both the Meseverde as Forfernte and sand-water free	v sizes, wall other all other to the to the to the the to the to the to the to the tother to the tother tot	eights, and lengths of proposed casings; indicate mustice, jobs, ce important proposed work) A CELLED Ag and comment to surface. A COLUMN ACCOUNTS CONTROL OF TABLE CONTROL O					
Propose To: Set 300 feet of 8 5/8" surface Drill with rotary to approximation. total depth and coment with 25 approximately 100 feet below to cover both the Measurds as Perforate and sand-water fraction.	v sizes, wall other all other to the total all other total al	eights, and lengths of proposed casings; indicate mustice, jobs, ce important proposed work) A CELLED Ag and comment to surface. A COLUMN ACCOUNTS CONTROL OF TABLE CONTROL O					
Propose To: Set 300 feet of 8 5/8" surface Drill with rotary to approximate through the Dahota formation. total depth and causat with 85 approximately 100 feet below to cover both the Messverde as Perforate and sand-water free East one-half, Section 24, 320 understand that this plan of work must receive approva	v sizes, wall other all other to the	eights, and lengths of proposed casings; indicate multiplies, jobs, ce important proposed work) ACCEPTED Ag and compact to surface. The production casing at two-stage compact collar surveyed formation and compact current cliffs formations. Formation. Sun 2 3/8" tubing.					
Propose To: Set 300 feet of 8 5/8" surface Drill with rotary to approximate through the Dahota formation. total depth and causat with 85 approximately 100 feet below to cover both the Messverde as Perforate and sand-water free East one-half, Section 24, 320 understand that this plan of work must receive approva	v sizes, wall other all other to the	eights, and lengths of proposed casings; indicate multiplies, jobs, ce important proposed work) ACCEPTED Ag and compact to surface. The production casing at two-stage compact collar surveyed formation and compact current cliffs formations. Formation. Sun 2 3/8" tubing.					
Propose To: Set 300 feet of 8 5/8" surface Drill with retary to approximate through the Dahota fermation. total depth and causat with 25 approximately 100 feet below to cover both the Measured as Forfarate and sand-water fractions and causat with 30 feet below to cover both the Measured as Forfarate and sand-water fractions and sand-water fractions. Last one-half, Section 24, 320 I understand that this plan of work must receive approve mpany. Aster Oil and the Company	v sizes, wall other all other to the	eights, and lengths of proposed casings; indicate multiplies, jobs, ce important proposed work) ACCEPTED Ag and compact to surface. The production casing at two-stage compact collar surveyed formation and compact current cliffs formations. Formation. Sun 2 3/8" tubing.					
Propose To: Set 300 feet of 8 5/8" surface Drill with rotary to approximate through the Debota formation. total depth and causat with 25 approximately 100 feet below to cover both the Measure fraction for feet and sand-water fraction. Last one-half, Section 24, 320 understand that this plan of work must receive approva	v sizes, wall other all other to the	rights, and lengths of proposed casings; indicate multiplies jobs, ce important proposed work) REFEVED Ag and coment to surface. Real depth of 7245 feet pAUG1 7 1962 The production casing at collection casing at collection casing at collection. Set two-stage counst collections. Set two-stage counst collections. Formation. Eur 2 3/8" tubing. Addicated to this well.					
Propose To: Set 30 feet of 8 5/8" surface Drill with rotary to approximate through the behave fermation. total depth and causat with 85 approximately 100 feet below to cover both the Meaverde as Ferferate and sand-water fraction. Last one-half, Section 24, 320 management of the section 24 management of the section 25	v sizes, wall other all other to the	rights, and lengths of proposed casings; indicate multiple jobs, ce important proposed work) RECEIVED RECEIVED RECEIVED RECEIVED Received comment to surface called to two-stage comment college formations. Received Cliffs formations. Received to this well. ORIGINAL SICNED BY JOE C. SALMON					
Propose To: Set 30 feet of 8 5/8" surface Drill with rotary to approximate through the behave fermation. total depth and causat with 85 approximately 100 feet below to cover both the Meaverde as Ferferate and sand-water fraction. Last one-half, Section 24, 320 management of the section 24 management of the section 25	v sizes, wall other all other to the	rights, and lengths of proposed casings; indicate multiplies jobs, ce important proposed work) REFEVED Ag and coment to surface. Real depth of 7245 feet pAUG1 7 1962 The production casing at collection casing at collection casing at collection. Set two-stage counst collections. Set two-stage counst collections. Formation. Eur 2 3/8" tubing. Addicated to this well.
