(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. 1 is located 2000 ft. from N line and 2380 ft. from W line of sec. 22  
22 144 of 22 1-12-N 1-12-W 22  
 (Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wildcat San Juan County New Mexico  
 (Field) (County or Subdivision) (State or Territory)

The elevation of the ~~surface~~ drill floor above sea level is \_\_\_\_\_ ft.

DETAILS OF WORK

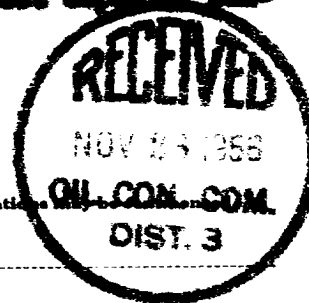

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Reynolds Mining Corporation proposes to drill an 8500 foot test or to the top of the pre-Cambrian or to impervious formation, whichever is the lesser depth. Approximately 270 feet of 13 1/8-inch casing will be set and completely cemented with cement, and 2500 feet of 9 5/8-inch casing with sufficient cement to protect casing from corrosive gases and protect possible production zones from contamination. All zones showing good signs of possible production will be adequately tested. Five and one-half inch casing will be run to the deepest depth of commercial oil and gas production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Reynolds Mining Corporation  
Oil and Gas Division  
 Address 1521 East Ninth Street  
Post Office Box 1328  
Durango, Colorado  
901
