Well No. MTN #3 is located 330 ft. from S line and 330 ft. from W line of sec. 13
SW 1/4, Sec. 13 (1/4 Sec. and Sec. No.) 31 North (Twp.) 15 West (Range) N.M.P.M. (Meridian)

Wildcat (Field) San Juan County (County or Subdivision) New Mexico (State or Territory)

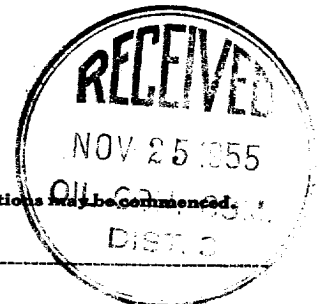

ungraded ground
The elevation of ungraded ground above sea level is 5576 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Using rotary rig, set approximately 120' of 9-5/8" or 10-3/4" OD surface casing. Circulate cement to surface and test for water shut-off. Drill 8-3/4" hole using mud to the top of the Gallup Sandstone expected at 2350'. Core and/or run hole Gallup section, run Schlumberger and DST. If Gallup is productive, may or may not sand oil-free. If Gallup is non-productive, hole will probably be carried to the Dakota. If either zone is productive, 7" OD, 12' casing will be used for production casing. If both zones are non-productive, plug and abandon.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
