November 8, 1962

Southern Union
Well No. No. 1 is located 600 ft. from S line and 1000 ft. from E line of sec. 16
S21 Sec. 16 S1 North 16 West N.M.P.M.
(34 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Verde Gallup **San Juan** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5724 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was spudded on October 24, 1962.
An 8 3/4" hole was drilled with water base mud to 724' below rotary table and 721' (measured from ground level) of 7" -55- 25lb. casing was run and cemented with 120 sacks on November 2, 1962. Cement was circulated to the surface.
After waiting 24 hours for the cement to harden, a pressure of 500 p.s.i. was applied and held for 15 minutes. There was no pressure drop and no apparent leaks.
The water was blown from the hole and drilling was started with air.
A total depth of 2011' was reached on November 8, 1962.
No fluid was encountered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
