DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The well was cleaned out from 3110 feet to 3262 feet and then placed on production. After approximately a week the formation was treated with 200 gallons of Controlflow and placed back on production. After a week cable tools were moved in and the well was cleaned out from 3055 feet 3390 feet at the end of the month.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
