Dallas, Texas

April 3, 1952

He: Southern Union Gas Commany-Heaver Lodge Corp., ' No. 1 McCov Unit well (SN NET 15-31N-10N.)

Mr. F. R. Spurrier New Mexico Cil Conservation Commission Santa Fe, New Mexico

Dear Dick:

Attached are five copies each of surveyor's plat and "notice of intention to drill" Southern Union Gas Company- Beaver Lodge Corp.,'s McCoy Unit No. 1 well, located 1910' south and 1650' east of the NW corner of the NET of section 18, 2-31-N., R-10-W., N.M. N.M. Blanco-LaPlata field, San Juan County, New Mexico.

You will note that the well location is unorthodox for the reason that if spotted in the usual location it would be in the river as indicated by the attached sketch prepared by the surveyor. It is my understanding that this location was discussed with Mr. Greer and has his approval as being the only possible location under the circumstances.

The well is located on a pooled unit of fee lands embracing all of the Ny of section 18, except those lands owned by Basilio Larcher, containing 267.76 acres more or less. Southern Union Gas Company made every possible effort to lease the property owned by Basilio Larcher and failing to lease endeavored to pursuade him to join the pooling agreement as a working interest owner. He refused to do either. We are enclosing an affidavit signed by Villiam E. Clark and H. C. Montgomery, employees of Southern Union Gas Company, and al Greer of the New Mexico Cil Conservation Commission staff, stating their contacts with Fr. Larcher with reference to the formation of the pooled unit.

The trust that the foregoing explanation will permit the early approval of this drilling location as one of the lesses involved carries a May 1, 1952 drilling commitment.

Please wire us collect when the location has been approved.

Yours very truly,

Can Thompson
