August 5, 1955

Mr. Charles Rieder  
Oil Conservation Commission  
Santa Fe, New Mexico

Dear Charlie:

Enclosed is a copy of a plat and a letter from Stanolind Oil & Gas Co. which is self-explanatory. As you can see, Stanolind originally filed a plat showing they were dedicating 320 acres to this well and later discovered that there was 40 acres of unleased land in the 320.

I have already informed them that it will be necessary for them to secure administrative approval of the non-standard unit and told them what would be required. However, as it is an unusual case we may have legal complications which I am not qualified to answer. I am sending it to you for further action. If you want us to shut the well in please advise, or if you want to send the shut-in notice out of your office, please send us a copy. At any rate I am quite sure the matter cannot be handled the way Stanolind suggests in the letter.

Yours very truly

Emery C. Arnold  
Supervisor, District #3
