Well No. 17-2 is located 990 ft. from N line and 400 ft. from W line of sec. 17

NW NW Sec. 17 31N 16W NMPH
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the ~~derrick floor~~ ground above sea level is 5562 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to test the Gallup (or Lower Niobrara) sands. Estimated total depth is 1700'. Approximately 100' of 7 5/8" O.D. 26.4# casing will be set and cemented to surface. 4 1/2" O.D. 9.5# casing will be run to T.D. and cemented to about 800' if production is commercial. Estimated top of the Gallup sand is 1620'. A sand oil fracture will probably be necessary to stimulate production.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
