August 19, 1957

Well No. 1-7 is located 990 ft. from S line and 990 ft. from W line of sec. 7SW-1/4 of 7
(1/4 Sec. and Sec. No.)31N 12W
(Twp.) (Range)R6M
(Meridian)BLANCO
(Field)San Juan
(County or Subdivision)New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Will drill with rotary tools and water base mud through Mesa Verde. Set casing through Mesa Verde, then drill with gas to test Dakota. Will set liner through Dakota if productive indications. Complete through casing perforations with water free stimulation of both Mesa Verde and Dakota. If both zones productive an approved type dual completion will be effected. Casing: 10-3/4" @ 175', 7" @ 5,000; 5 1/2" liner @ 6700'. Productive sands expected: Mesa Verde (Pt. Lookout) 4500'-4800', Dakota 6600'-6700'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company COLORADO WESTERN EXPLORATION, INC.Address 312 U. S. National Bank Bldg.Denver, ColoradoBy MARY A. THRELKELD, JR.Title President

• The first step in the process of creating a new product is to identify a market need. This can be done through market research, which involves gathering information about the target market and its needs. Once a market need has been identified, the next step is to develop a product concept. This involves creating a detailed description of the product, including its features, benefits, and target market. The product concept is then used to develop a business plan, which outlines the company's strategy for producing and marketing the product. The business plan is then used to secure funding from investors or lenders. Once funding has been secured, the company can begin the process of developing the product. This involves hiring a team of engineers and designers to create a prototype of the product. The prototype is then tested to ensure that it meets the requirements of the market need. Once the prototype has been tested and approved, the company can begin the process of manufacturing the product. This involves setting up a production line and hiring workers to assemble the product. The final step in the process is to market the product. This involves creating a marketing plan that outlines the company's strategy for promoting the product and reaching its target market. The marketing plan is then implemented, and the product is launched into the market.

• The second step in the process of creating a new product is to develop a business plan. This involves creating a detailed description of the product, including its features, benefits, and target market. The business plan is then used to secure funding from investors or lenders.

• The third step in the process of creating a new product is to develop a marketing plan. This involves creating a detailed description of the product, including its features, benefits, and target market. The marketing plan is then used to secure funding from investors or lenders.

NEW MEXICO OIL CONSERVATION COMMISSION
Well Location and Acreage Dedication Plat

Section A.

Date August 19, 1957

Operator COLORADO WESTERN EXPLORATION CO. Lease Government-Owned
Well No. 1-7 Unit Letter M Section 7 Township 31 NORTH Range 12 WEST NMPM
Located 990 Feet From the SOUTH Line, 990 Feet From the WEST Line
County SAN JUAN G. L. Elevation 5884.0 Dedicated Acreage 156.21 Acres
Name of Producing Formation Dakota Pool Unnamed

1. Is the Operator the only owner* in the dedicated acreage outlined on the plat below?
Yes x No .
2. If the answer to question one is "no," have the interests of all the owners been consolidated by communitization agreement or otherwise? Yes No . If answer is "yes," Type of Consolidation
3. If the answer to question two is "no," list all the owners and their respective interests below:
