Dear Mr. Arnold:

Attached Packer Leakage test on the above captioned well. The data on the test was taken from information I have obtain from subject well beginning January 19, 1962, when the Dakota zone was first delivered and April 14, 1962, when the Mesa Verde zone was shut-in. The reason we did not submit the test at that time, we were anticipating the rescheduling of the test due to the great amount of down time from the Dakota zone.

I hope the above is satisfactory. In the event additional information is required please advise.

Very truly yours,

Lonnie Kramer
