12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Benson-Montin-Greer Drilling Corp., as operator of the A. Gross #1 gas well, proposes to test gas production volume available from the well.

This well is located near the home of Mr. Mike Fauteaux who captures and trains wild birds. These birds are housed close to the well, consequently noise from the well may disturb the birds. Mr. Fauteaux will be present when the well is produced to the atmosphere for test purposes and will cooperate with the operator in testing.

Subject to the results of this test, the well will be put on production or plugged and abandoned in accordance with New Mexico Oil and Gas Conservation Division instructions.

Testing will be completed within the next few weeks.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
