17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

This well was temporarily abandoned in 1961, by cutting tubing at 3511' and spotting a 100 sack cement plug, the top of which is at 3500'. It is now intended to plug and abandon this well as follows:

1. Cut and pull the portion of the 7" casing string which is free.
2. Spot a 50 sack cement plug on 7" casing stub and spot a 50 sack cement plug at the base of the Ojo Alamo. If the Ojo Alamo is not exposed by pulling the 7" casing, perforate and squeeze at the base of the Ojo Alamo to isolate the zone from deeper gas bearing strata.
3. Spot a 25 sack cement plug at base of surface casing and at the surface.
4. Install a dry hole marker and restore location to original contours.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
