(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding job;, cementing points, and all other important proposed work)

The well was cleaned out to 5965' and a radioactivem tracer survey was taken in the well. The survey showed that several somes were taking fluid in the following amounts: 5840-50' taking 10%, 5853-66' taking 30%, 5370-30' taking 40%, 5836-90' taking 10%, and 5894-5900' taking 10%. The well was then placed on production and is presently recovering load oil.

I understand that this plan o	f work must receive approval in writing by th Standard 011 Company	e Geological Survey b の名 『今本品書	pefore operations may be commenced.
