Re: Patterson A Com #1 O-2-31N-12W

Dear Smitty:

The 1984 packer test on the referenced well was inconclusive. Please reschedule and retest the well in such a manner as to prove zone separation. Shut both zones in for a minimum of three days. Blow the higher pressured zone to the atmosphere for as long as it takes to get a significant pressure drop.

Advise this office at least 24 hours prior to the test, so we may provide a witness.

Yours truly,

A handwritten signature in cursive script, reading "Charles Gholson".

Charles Gholson  
Deputy Oil & Gas Inspector
