NAVAJO TRIBE OF INDIANS "G"

Well No. 8 is located 640 ft. from SW line and 1900 ft. from E line of sec. 1

SW SE Section 1 11N 17W NMP

(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Unmanned San Juan New Mexico

(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft. 5,606' Unmanned

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 1,395', a Sematco test. Approximately 30' of 7" surface casing will be run and cemented to surface. If production is encountered the required amount of 1 1/2" casing will be run and cemented with sufficient cement to cover the highest potentially productive zone. The well will be drilled with air as circulating fluid. All shows will be tested and logs will be run prior to setting casing or abandonment. Stimulation treatments may be used in completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
