June 17, 1959

Well No. 3-5 is located 2310 ft. from SW line and 1650 ft. from E line of sec. 5

SE 1/4 Sec. 5 T31N R17W W4PM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Chimney Rock (Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)
8 nd)

The elevation of the derrick floor above sea level is 5274 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well has been plugged and abandoned. Approval for plugging was granted March 20, 1959. None of the casing was pulled. It is proposed to clean out this well to 1155' in the 4-1/2" casing, perforate the casing opposite the Gallup sand section, free well with sand and base crude, and attempt to complete as an oil well. See USGS Form 9-330, filed November 12, 1958, for well log and casing details.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
