Dear Mr. Phillips:

The enclosed packer leakage test report for subject well has some pressure discrepancies as shown on the test report.

The pressure of 1150 psig seems high for the Mesaverde Formation in the area of this well. This highest pressure of record in this office is 862 psig for this well.

Please check your field notes and resubmit the packer leakage test.

Yours very truly

A. R. Kendrick
Engineer, District #3
