(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

May 13, 1963

Navajo Tribe of Indians "G"
Well No. 12 is located 2305 ft. from [N] line and 2235 ft. from [E] line of sec. 1

SW NE Section 1 11N 17W 107W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Navajo Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5334 ft. Ungrated

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, including points, and all other important proposed work)

NOTE: Our plans are not definite as to which location will be drilled next.
A well number will be assigned before any work is started.

Well location off center due to terrain.

Rotary drilling equipment will be used to drill to approx. 1300', a Sematite test. Approx. 75' of 8-5/8" surface casing will be run and cemented to surface. If production is encountered the required amount of 4 1/2" casing will be run and cemented with sufficient cement to cover the highest potentially productive zone. Air, oil or mud may be used for circulation. All shows will be tested and logs will be run prior to setting casing or abandonment. Stimulation treatments may be used in completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Humble Oil & Refining Company

Address P. O. Box 3062

Durango, Colorado
