(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Havajo Tribe of Indians "G" June 23, 19 63
Well No. 22 is located 1200 ft. from N line and 660 ft. from E line of sec. 2
S2 NE Section 2 12E 17N 100W
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Marathon Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5257' ft. Regraded 6-2-63

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs; indicate casing points, and all other important proposed work)

Rotary drilling equipment will be used to drill to approximately 1250', a
sensitive test. One joint of 7" surface casing will be run and cemented to
surface. If production is encountered the required amount of 2-7/8" casing
will be run and cemented with sufficient cement to cover the highest
potentially productive zone. Water and mud will be used for circulation.
It is planned to eventually use this well as a water flood injection well;
however, it will be fractured and possibly sand tested.

Verbal approval 6-28-63 from Mr. Rudy Baier.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
