It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

Figure 1 consists of a 10x10 grid of scatter plots. The horizontal axis (X-axis) represents the number of children in the household, ranging from 0 to 9. The vertical axis (Y-axis) represents the number of children in the neighborhood, also ranging from 0 to 9. Each of the 100 plots in the grid contains data points representing the relationship between these two variables for a specific year. The years are arranged in a 10x10 grid, with the top row representing years 1980-1989 and the bottom row representing years 1990-1999. The plots show varying degrees of clustering and correlation, with some years showing a clear positive relationship and others showing more scattered data.
