U. S. GEOLOGICAL SURVEY
FARMINGTON, NEW MEXICO

May 9, 1963

Navajo Tribe of Indians
Well No. 11 is located 660 ft. from N line and 660 ft. from E line of sec. 8
NE NE Section 8 (1/4 Sec. and Sec. No.)
Unmanned (Field)
San Juan (County or Subdivision)
New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 5300 ft. **5300' Ungraded**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

NOTE: Our plans are not definite as to which location will be drilled next.
A well number will be assigned before any work is started.

Rotary drilling equipment will be used to drill between 1200 and 1300', a Sonotube test. Approx. 75' of 8-5/8" surface casing will be run and cemented to surface. If production is encountered the required amount of 12" casing will be run and cemented with sufficient cement to cover the highest potentially productive zone. Air, oil or mud may be used for circulation. All shows will be tested and logs will be run prior to setting casing or abandonment. Stimulation treatments may be used in completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
