San Juan Co., New Mexico

12-POINT SURFACE USE PLAN

1. The proposed location is approximately 15 miles in a northwesterly direction from the north exit from N.M. Hwy. 550 near Waterflow, N.M. A paved road runs north at this exit for approximately two or three miles to a point immediately south of the San Juan power plant. At this point, turn west on an existing dirt road and follow in a northwesterly direction finally to a point on this road which is located approximately one quarter of a mile north of a well designated Windmill No. A-11 as shown on U.S.C.S. Heifer Point - N.Mex.-Colo. topographic map. Here, turn south on the access new road and follow approximately 1300' to the well location.
2. The access road to the location will be approx. 1300' long, running south from the existing road. The tank battery, if required, will be constructed on the location near the wellsite.
3. The proposed location is 2310' INL and 2310' FWL of Section 14, Township 31 North, Range 16 West in San Juan County, New Mexico. This is to be a proposed 2310' Dakota sand well, and all drilled formations will be tested as would any prudent operator. (See attached topo. map).
4. No lateral roads to other locations are planned.
5. If well is a producer, tank battery will be constructed on existing well pad.
6. Fresh water will be trucked from the San Juan river approximately 11 miles to the south.
7. Waste disposal will be in the reserve pit and trash pit. A pit for cuttings while air drilling will be 15 to 20 feet east of the wellsite.
- 8.&9. No camps or airstrips will be constructed.
10. A rig layout plat is attached.
11. The surface will be restored as near possible to the original condition, including grading the location and pits as soon as practical. Grass will be reseeded on the disturbed area of the location.
12. The terrain in the area is that of rather flat rolling hills, with sagebrush and some native grass and juniper. Very little grading will be required to level the well pad and will not affect the natural drainage of the area.
