12. Describe Proposed or Existing Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is subsequently drilled, give subsurface locations and measured and true vertical depths for all meters and tools pertinent to well work.)

Amoco Production Company has modified the subject well as follows: on 9/2/87, a blind plate was installed at the surface to prevent gas sales. All production equipment associated with the Fruitland Coal WBS is dismantled. Amoco is using the well as a pressure monitor well for the Fruitland Coal. If the well shall no longer be used as a pressure monitor well, the coal horizon will be plugged and abandoned at that time. From this point forward the Pritchard C #1 (1430' PBL, 1540' FEL) will become the producing well for the coal horizon for the 320 spacing unit.
