If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Amoco Production Company recently ran a Noise Log to determine if flow was occurring between the exposed formations.

Upon evaluation of the log, it has been determined that zonal isolation does not exist and the Fruitland Coal Formation may be currently charging the Ojo Alamo water sand.

A subsequent sundry to remediate this condition will be forthcoming.

If you have any questions please contact Julie Acevedo at 303-830-6003.
