14. API NO.

15. ELEVATIONS (SHOW DF, KDB, AND WD)

6271' GR

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The Suter 1A well was completed as a dual MV-PC flowing gas well on 7-18-79. The Pictured Cliffs zone logged off with water on initial test (8-2-78). Several attempts to unload this zone have failed, consequently, this zone has not produced. Due to the large amount of produced water from the Pictured Cliffs reservoir, Mesa will temporarily abandon and will plug and abandon at such time that it is necessary to perform downhole work to maintain production from the Mesaverde zone.

Note: Attached copy of Form 9-330 and Form C-122 for Mesaverde and Pictured Cliffs zones.

Subsurface Safety Valve: Manu. and Type N/A Set @ Ft.
