

Robert C. Anderson  
Ute Mtn. Ute No. 5  
SW NE Sec. 14 - Twp. 31N-R16W  
San Juan Co., New Mexico

13-POINT SURFACE USE PLAN

1. The proposed location is approximately 15 miles in a northwesterly direction from the north exit from N.M. Hwy 550 near Waterflow, N.M. A paved road runs north at this exit for approximately two or three miles to a point immediately south of the San Juan power plant. At this point, turn west on an existing dirt road and follow in a northwesterly direction finally to a point on this road which is located approximately on half mile southeast of a windmill designated Windmill No. A-11 as shown on U.S.G.S. Heifer Point - N.Mex.-Colo. topographic map. Here, turn north on access road and follow approximately 200 feet to the well location.
2. The access road to the location will be approx. 200+ feet long, running north from the existing road. The tank battery, if required, will be constructed on the location near the wellsite.
3. The proposed location is 1650' FNL and 1650' FEL of Section 14, Township 31 North, Range 16 West in San Juan County, New Mexico. This is to be a proposed 2325' Dakota sand well, and all drilled formations will be tested as would any prudent operator. (See attached topo. map).
4. No lateral roads to other locations are planned.
5. If well is a producer, tank battery will be constructed on existing well pad.
6. Fresh water will be trucked from the San Juan river approximately 15 miles to the south.
7. Waste disposal will be in the reserve pit and trash pit. A pit for cuttings while air drilling will be 15 to 20 feet east of the wellsite.
- 8.&9. No camps or airstrips will be constructed.
10. A rig layout plat is attached.
11. The surface will be restored as near possible to the original condition, including grading the location and pits as soon as practical. Grass will be reseeded on the disturbed area of the location.
12. The terrain in the area is mostly rolling prairie with sparse native grass. Little grading will be required for the well site and will not affect the natural drainage of the area.

13. I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by Robert C. Anderson and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved.
