NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, L. A. Aimes, being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:
That I am employed by El Paso Natural Gas Co. in the capacity of
Petroleum Engineer, that on April 21, 1978
I personally supervised the setting of a Baker Model G Seal Assembly in a Polished Bore Receptacle
Make & type of packer
in EPNG Co's, Atlantic C,
Operator of well *Lease name*
Well no. 1A located in the Undes. P.C. - Blanco M.V. field,
San Juan county, state of New Mexico, at a subsurface depth of
3312' feet, said depth measurement having been furnished me by
tubing tally measurement;
That the purpose of setting this packer was to effect a seal in the annular space between two
strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well,
of fluids produced from a stratum below the packer with fluids produced from a stratum above the
packer; that this packer was properly set and that it did, when set, effectively and absolutely seal
off the annular space between the two strings of pipe where it was set in such manner as that it
prevented any movement of fluids across the packer.

L. A. Aimes
