Gentlemen:

Although Getty Oil Company has no objection to the drilling of the Freeman 1-A by Consolidated Oil and Gas at the above location, to test the Mesaverde and Basin Dakota horizons, we do not believe the Dakota could be granted an allowable in the absence of special field rates.

The granting of an allowable to the new well would be an exception to the present rules and regulations by allowing production from two wells within the same proration unit.

It is our opinion that a special hearing would be required to consider such an application.

Very truly yours,

W. J. Newman
