		NORTHWEST NEW	MEXICO PACKER L	EAKAGE	TEST INSTRUCTIO	ONS					
1. A packer leakage test	shall be commenced on each n	nultiply completed well within	ha			ed zone shall remain shi	ut-in while the zone which was previously				
order authorizing the multi-	ple completion. Such tests sha	lly thereafter as prescribed by the line of the line o	ne	shut-in is produced.							
multiple completions within seven days following recompletion and/or chemical or fracture treatment, and whenever remedial work has been done on a well during which the				pressure gauge at time intervals as follows: 3 hours tests: immediately prior to the							
	een disturbed. Tests shall also d or when requested by the Di-			beginning of each flow period, at fifteen-minute intervals during the first hour t at hourly intervals thereafter, including one pressure measurement immediately			ire measurement immediately prior to the				
	r to the commencement of any	or	conclusion of each flow period. 7-day tests: immediately prior to the beginning of each flow period, at least one time during each flow period (at approximately the midway point)								
shall notify the Division in operators shall also be so n	writing of the exact time the t	est is to be commenced Offset		and immediately prior to the conclusion of each flow period. Other pressures may be taken as desired, or may be requested on wells which have previously shown questionable test							
3 The packer leakage te	st shall commence when both	zones of the dual completion ar	e	da		all pressures, through	out the entire test, shall be continuously				
shut-in for pressure stabiliz	zation. Both zones shall remai	n shut-in until the well-head ey need not remain shut-in mor			measured and recorded with recording pressure gauges the accuracy of which must be checked at least twice, once at the beginning and once at the end of each test, with a						
than seven days.		-,		de	adweight pressure gauge	e. If a well is a gas-oil	or an oil-gas dual completion, the				
4. For Flow Test No. 1,	one zone of the dual completion	on shall be produced at the norm Such test shall be continued for	nal		recording gauge shall be required on the oil zone only, with deadweight pressures as required above being taken on the gas zone 8. The results of the above-described tests shall be filed in triplicate within 15 days a completion of the test. Tests shall be filed with the Aztec District Office of the New Mexico Oil Conservation Division on Northwest New Mexico Packer Leakage Test Fo Revised 10-01-78 with all deadweight pressures indicated thereon as well as the flowin						
seven days in the case of a	gas well and for 24 hours in th	he case of an oil well. Note: if,	on	•							
	st, a gas well is being flowed t w period shall be three hours.	o the atmosphere due to lack of	a	со							
	n of Flow Test No. 1, the well	shall again be shut-in, in		Re							
 accordance with Paragraph 6. Flow Test No. 2 shall 		leak was indicated during Flow	v	ter	mperatures (gas zones o	niy) and gravity and GC	JK (oir zones only).				
Test No. 1. Procedure for	Flow Test No. 2 is to be the sa	ame as for Flow Test No 1 exc	ept
