12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Please reference telephone conversation on May 17, 2002, between representatives of BP America and Charlie Perrin, NMOCD, regarding bringing various inactive wells into compliance.

Verbal permission was granted to temporarily abandon the well (i.e. pressure test for casing integrity) in order to bring well into compliance and hold for possible production stimulation in the current zone or obtain partner approval to plug and abandon. If the casing integrity test fails we will suspend operations and obtain approval to proceed with plug and abandonment operations.

We have concluded a successful casing integrity test on the subject well as follows:

06/14/2002 MIRU workover rig. TOH w/production TBG. RIH w/ RBP & set @ 2478'. Pressure tested CSG to 600 psi. CSG pressure tested OK. Retrieved RBP & TOH. RIH w/PROD TBG & land @ 2660'. 06/18/2002 RDMO workover rig.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
