17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was drilled to a TD of 10⁷⁰ 70'. Completion attempts were not successful due to mechanical difficulties. A fish made up of a cement retainer and 91' of 2-3/8" tubing was left in the hole at 920±'. We plan to twin this well with the proposed 'F' #147R. It is our intention to plug this well to your specifications in early June, 1983. A 50' cement plug will be set from 920±' to 870±'. A 50' cement plug will be set at surface. The casing will be cut off below the surface and a dry hole marker installed.
