There is still a high probability of oil and gas under this lease. This well is cased to 1649' and is cemented back to surface. It is capped. When finances allow, we intended to explore deeper formations through these holes. It also appears that we might want to frac one of the six wells on this lease that are capable of being fraced. We still do not have the finances to proceed at this time. These wells can cause no harm and would prevent building another location in the event of deeper exploration. We wish to continue this well on temporary abandonment.
