13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

The subject well failed the recent packer-leakage test and this notice is to inform the BLM & OCD of plans to correct this problem. This well is located in the BLM's winter closure area, so sometime after March 31, 2001 we will pull the packer and both tubing strings. Test the casing, and inspect the tubing and replace any bad joints we may find. We will then re-run the tubing strings and the packer and retest the packer returning the well to production.

14. I hereby certify that the foregoing is true and correct
Name (Printed/Typed)
