(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Snyder Oil Corporation proposes to lay a 4" gas gathering line and construct a compressor site to connect the subject well to a tie in point on Gas Company of New Mexico as shown on the attached survey plats. The pipeline construction will require a 40' wide right of way (20' on each side of centerline survey with a total length of 2973.56'. The compressor site is 150' x 150' (0.52 acres). The project is on Federal surface. An archeological survey of the entire route has been completed by Southwest Archeological Services, Inc. with the results contained in Technical Report No. 93-SASI-062S which has been forwarded to the BLM. Pipeline specifications are shown on the attached sheet.

Snyder intends to commence construction of this project as soon as approval is issued.

SNYDER OIL CORPORATION
PIPELINE SPECIFICATIONS

LINE SIZE: 4" Nominal.

PIPE SPECS: 4.5" O.D., 0.237" wall thickness, plain end seamless, Grade A25 or better manufactured in accordance with API Spec 5L.

BURIAL DEPTH: (+/-) 48". Sand padding will be used in all portions of ditch that have rock bottom and/or sides.

JOINING METHOD: Welded as per API Standard 1104.

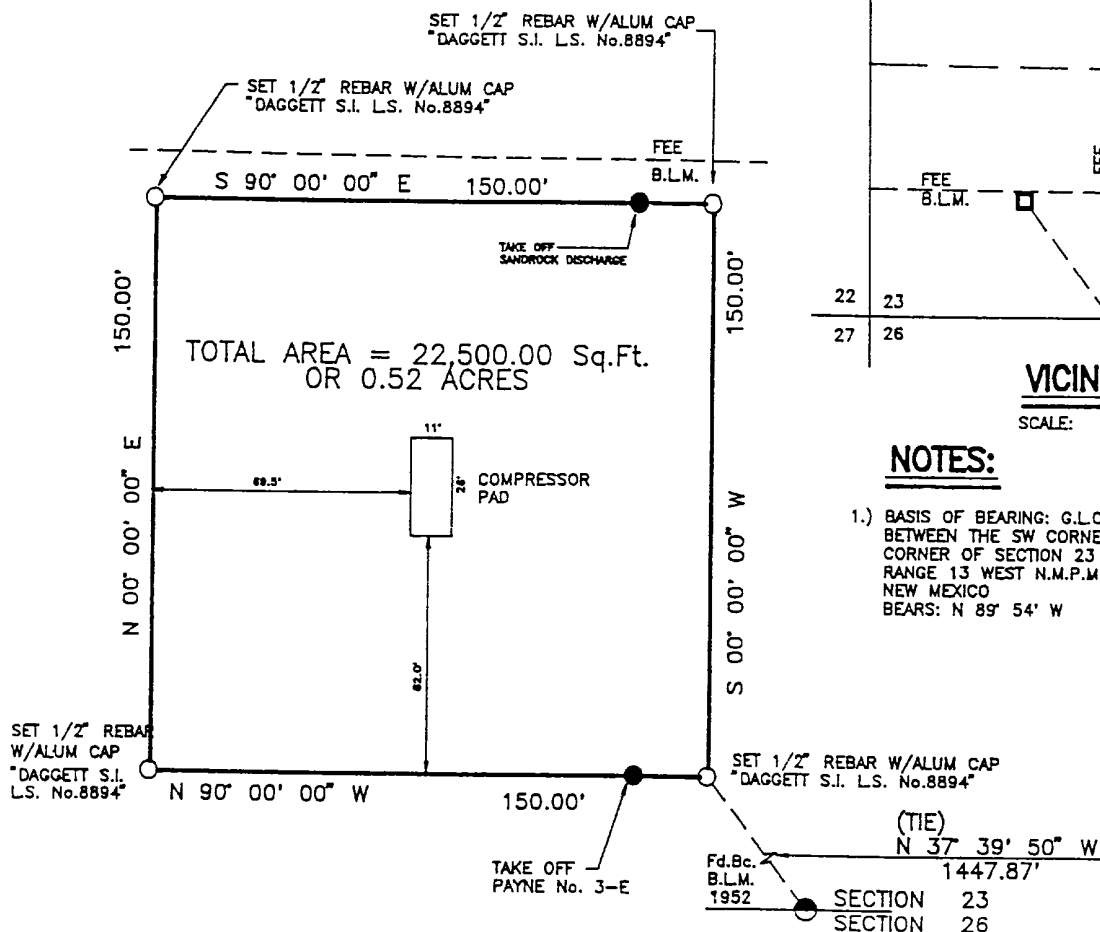

SYSTEM OPERATING PRESSURE: 150 psig.

TESTS: 10% of welds will be radiologically inspected.
Pipe will be tested to 500 psig prior to backfilling.

NOTIFICATIONS: All owner/operators of offset or crossed below ground facilities will be notified prior to start of construction.

MARKING: Pipeline route will be marked with appropriate markers at all road crossings and on a line of sight spacing through the entire route.
