Attention: Charlie Perrin

Injection Well Pressure Exceedence Notification

This will confirm our phone conversations on August 21, 2001 concerning the above subject exceedence for the Pritchard SWD pressure limit of 1676 psi. The above limit pressure ranged up to 75 psi over a 12-hour period from 6PM August 20, 2001 through 6AM August 21, 2001.

This exceedence was the result of our shutdown switch being adjusted upward by a new employee. Corrective actions will include both training for new employees as well as a lock box for all kill switches, which will require two bp personnel to access.

Please call if you have any questions.

Buddy Shaw  
Environmental Coordinator
