13. Describe Proposed or Compelled Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We plan on adding the Lewis Shale completion to the existing Mesa Verde. 7", 23#, J-55 casing @ 4023 with 4 1/2", 11.6#, J-55 liner from 3928' to TD of 6200'. DV tool @ 2972'. Will complete Lewis Shale with a 3 1/5" Frac String and 7" packer set @ +/- 3900'.

Lewis Shale completion will be a 2 stage Foam Frac as Follows:
Lower Lewis Shale 4642' - 4920' and perforate 50 - .38" holes.
Upper Lewis Shale 4248' - 4535' and perforate 50 - .38" holes.

To complete this formation we will need to construct an earthen blow pit (30' x 50' x 10' deep). All work will be within existing disturbed location. We will close pit when all water has been removed and re-seed to BLM specs.

We plan on completing this formation upon BLM approval and rig availability.

I hereby certify that the foregoing is true and correct
