13. Describe Proposed or Completed Operations

A CBL run on 3/5/02 by Black Warrior Wireline has shown TOC in the 4-1/2" liner to be at 4940'. In the 7" casing, the TOC is at 986'.

Permission was granted from Steve Mason on 3/13/02 to leave 7" TOC as is (at 986'). The only formation above 986' is the Nacimiento. There are no plans for remediation on the 7" casing. Upon abandonment, the necessary plugs will need to be set.

Remediation is necessary on the liner for fracture stimulation isolation. Permission was granted from Steve Mason on 3/13/02 to proceed with the following remediation plans: perforate a squeeze hole at 3641' and pump 200sx of Class B Neat under a cement retainer. A CBL will be run to determine new TOC. If zonal isolation is not achieved, subsequent squeeze(s) will follow.

14. I hereby certify that the foregoing is true and correct.
