(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6088 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was plugged and abandoned on April 8, 1960.

Cement plugs were spotted as follows:

45 sacks 4450' - 4610'
30 sacks 2900' - 3000'
75 sacks 2300' - 2550'

The 93 feet of 13-3/8" surface casing was left in the hole - but at the request of the rancher who owns the water rights it was not plugged.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
