Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

6-28-74 TD 2650' ~~RKB~~. Ran 83 joints 7" casing (58 joints 17#, 25 joints 23#), total 2258.05 TO, with Larkin guide shoe (1.00') and insert Baker float. Landed casing at 2555' RKB. Cemented with 122 sacks 65/35 Pozmix, 10% gel, 12# Gilsonite per sack, and 150 sacks Class A cement with 12# Gilsonite per sack. Circulated cement to surface. Good returns. After pumping plug pressure did not hold. Had approximately 500# bleed-off (1300# to 800#) in 5 minutes.

6-30-74 Pressure tested 7" casing to a 700# psi. Shut in at 650#. With drill pipe rams on blowout preventer leaking slightly pressure decreased to 615# in 5 minutes.
