January 29, 1957

Mr. A. L. Porter, Jr.
Oil Conservation Commission
Santa Fe, New Mexico

Dear Pete:

We have received your letter of January 21, 1957 regarding plugging bonds for the Spanish Bit Oil Company well.

We still have not heard from Mr. Brian Johnson, whom we wrote on December 22, 1956. As the file on this well shows, we have made every effort to contact someone who can speak for the Spanish Bit Oil Company in this matter with no success. It therefore appears to me that the only way we could handle the matter would be to call a show-cause hearing to show why the well should not be properly plugged and abandoned and the reports filed. Perhaps if it was done in this way the various parties might show a little more interest in getting the matter straightened out.

Yours very truly

Emery C. Arnold
Supervisor, District #3

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium for 24 h at 28°C. The cell concentration of the strains was adjusted to 1.0 × 10⁸ cells/ml. The cell suspension was mixed with the plant tissue and incubated for 24 h at 28°C. The plant tissue was then cultured on the selective medium. The transformation efficiency was determined by the number of transformants per plant tissue. The data were the mean of three independent experiments.
