The elevation of the ~~center~~ ^{ground} floor above sea level is 6050 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The approximate casing program is as follows:

- 40 to 60' - 20" OD Conductor pipe cemented to surface
- 650' - 13-3/8" OD Surface casing cemented to surface.
- 3000' - 9-5/8" OD Casing (if necessary to shut off water supply from the Morrison)
- 7" OD Casing (oil string if necessary)

The principal objective sands in this well are the Dakota and Entrada. The lowest objective is the Mississippian.
Estimated total depth - Pre-Cambrian at approximately 7500'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
