Wildcat McKinley New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6701.3 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Because of poor oil showings in our 14-3 Hozjak Test, have decided to abandon above location, without drilling same.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Jorge Semtonitch
