(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Midland, Texas July 15, 19 52

Well No. 1 is located 760' ft. from N line and 660' ft. from W line of sec. 1
3-4 of 3-4, Sec. 1 T-24-N R-9-W N. R. P. M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Midland San Juan New Mexico New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is - ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to a depth of approximately 750' to test the Dakota.

Surface casing will be set at approximately 400', c. t. will be circulated. The oil string will be set at approximately 7500', with cement used in amount 1-1/2 times the capacity of the annulus. Surface casing & oil string will be tested for water shut off both before and after drilling of plugs.

Any zones or formations that may appear productive will be tested as the well progresses.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
